

COMMISSION ON THE DIGITAL ECONOMY

BIANNUAL MEETING

27 April 2020

Agenda

What to expect today

❖ **PART 1: Operational and governance matters**

- *15:10-15:30 ICC Knowledge Solutions Department – vision and strategy 2020*

❖ **PART 2: Policy and advocacy projects of the Commission**

- *15:30-16:00 Cybersecurity*
- *16:00-16:55 IGOs activities on digital economy and regulatory landscape*
- *17:00-17:50 Artificial intelligence*
- *18:00-18:30 Linkages with other sectors*

❖ **PART 3: Overview and next steps**

- *18:30-18:45 Brainstorming and feedback*
- *18:45-19:00 Recap of priorities and confirmation of work plan*

Knowledge Solutions and External Engagement 2.0

Clarifying our value proposition

What we do...

Our increasingly complex and fast-changing world calls for new forms of leadership, collaboration and governance — redefining the purpose of business in every sector and every country.

As the institutional representative of over 45 million businesses — with unparalleled access into major intergovernmental fora — we are uniquely positioned to leverage the creativity, expertise and innovation of the private sector to deliver global solutions to interconnected problems and challenges.

We take a purpose-led approach to policy and external engagement — encompassing a mix of advocacy, standard setting, thought leadership and partnerships. This holistic model of engagement across eight thematic areas is designed to enable genuine systems change — for people, planet and prosperity — by shaping global policy, norms and business practice.

Clarifying our value proposition

Why engage...

The International Chamber of Commerce provides an inclusive platform for companies — of all sizes, sectors and locations — to shape the future of the global economy and forge collective solutions to major business challenges.

Participation in ICC initiatives provides access to unparalleled intelligence from the global business community on public policy developments — ensuring you can stay ahead of the curve in navigating regulatory change at both global and local levels — while enabling peer-to-peer learning and the sharing of essential know-how.

Working with ICC provides the opportunity to shape global business positions and campaigns that have real influence where it matters. Together, we also develop practical solutions to challenges that no single company can tackle alone — leveraging ICC's long history of creating recognized standards and tools to facilitate commerce and drive sustainable business practices.

Participation in projects is open to all ICC members and facilitated by flexible working methods — including thematic commissions and expert working groups — designed to fully leverage the collective expertise of our diverse network.

Landing a structure that works

8 central themes

1 **21st Century Trade**

Incorporating four sub-themes: **system reform**; **digital trade**; **sustainable trade**; and **trade financing**

3 **Enabling Entrepreneurship**

MSME focused activities, customs/WCO, ICC Centers for Entrepreneurship, GATF

5 **Digital Governance**

Internet governance, cybersecurity, artificial intelligence

7 **Integrity in Business**

Anti-corruption, anti-counterfeiting/BASCAP

2 **Innovative and Competitive Markets**

Taxation, competition, intellectual property

4 **Financing our future**

Sustainable finance, blended finance, non-financial reporting

6 **Business in Society**

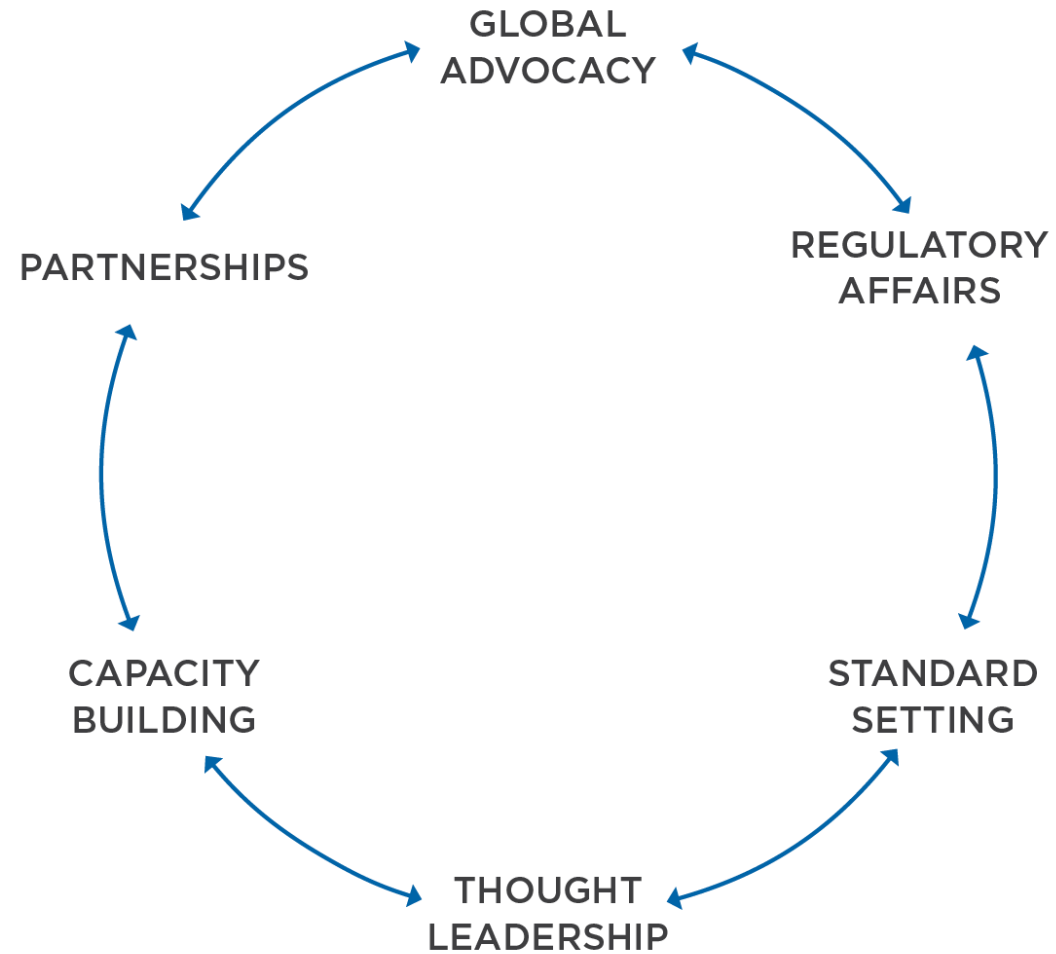

Business and human rights, migration, refugee response, diversity

8 **Climate Action and Green Economy**

UNFCCC engagement, SME climate tools, NDC revision pilots, biodiversity

Landing a structure that works

Clarifying how we engage

Landing a structure that works

The workplan 2.0

Sustainable Trade

There is a growing focus from a range of stakeholders on the interface between trade and sustainability. The UN's 2030 Agenda calls on all countries to "use trade to create a more sustainable, inclusive and resilient world" – but questions remain on how to fully harness trade policy to drive sustainable development. ICC champions and informs trade policy reforms to ensure effective alignment between economic, social and environmental objectives – leveraging our global network and unique position in multilateral institutions to achieve real results. We are also establishing standards and tools to support companies in their efforts to transition towards more sustainable patterns of trade and associated financing.

Global Advocacy	International Regulatory Affairs	Standard Setting/Rules	Research/ Thought Leadership	Partnerships
<p>WTO Fisheries Subsidies Negotiations Global advocacy campaign to secure WTO agreement eliminate harmful fisheries subsidies by end-2020. Agenda vital to credibility of WTO and the SDGs – as well as protection of marine biodiversity.</p> <p>Trade and Climate Change Political advocacy to promote alignment between trade and climate regimes – leveraging ICC's unique links into the WTO and UNFCCC – with the aim of promoting effective climate action and avoiding damaging trade frictions.</p>	<p>Trade and the Circular Economy Development of new flagship papers identifying trade obstacles to the creation of a circular economy drawing on the on-the-ground experience of business. Analysis will be complemented by workshops with key policymakers in the European Commission and WTO.</p>	<p>Sustainable Trade Finance Guidance Development of a groundbreaking taxonomy to help banks and regulators assess whether a trade finance transaction is sustainable.</p>	<p>ICC x Economist Intelligence Unit study on trade and climate Baseline analysis of interrelationship between trade and climate regimes – including possible synergies and frictions – to inform engagement with policymakers.</p>	<p>ICC x Perlin Clarify Unique blockchain solution to provide full value chain traceability on a transparent, verifiable and immutable decentralized database. Open to use by ICC members.</p>

Operationalization and delivery

- Re-energization of ICC Commissions as leading global peer groups to enable knowledge sharing and provide strategic guidance on ICC's work
- Establishment – where needed – of new working groups to support the rapid development of policy content and support strategic engagement
- Full leveraging of partnerships to support content/product generation
- Identification of “signature” initiatives for 2020 taking advantage of key external opportunities and reflecting corporate demand

Selected Signature initiatives 2020

- **Renewing the WTO “e-commerce” moratorium**
Vital for future of digital economy. Issue of top level importance to major corporates. Reboot of 2019 campaign
- **Establishing new standards for digital trade and finance**
Landmark ICC “Digital Standards Initiative”
- **Shaping a new model for Internet governance**
Intensification of engagement with UN on revision of current Internet governance models
- **COVID-19 response**
Building on landmark partnership with WHO to enable effective response by business

The approach in practice...

- **ICC e-commerce working group** established in May 2019
- Initiative responds to identified need for technical expertise to shape ongoing WTO negotiations on digital trade
- Strong member engagement – over 130 companies on the group as of end-February 2020
- A cross-cutting approach: initiative supported by HQ staff in NYC, Paris and Geneva and leverages corporate expertise in several ICC commissions (e.g. taxation, customs)
- 7 substantive papers issued with a major impact on the WTO negotiations. 5 workshops held with negotiators.
- Strong NC support for in-country advocacy
- Successful “mini-campaign” to secure renewal of WTO moratorium on application of tariffs to cross-border data flows – generating significant media coverage for ICC in the process

Enabling an effective business and policy response to COVID-19

COVID-19: ICC Strategic Response

The dramatic spread of COVID-19 has disrupted lives, livelihoods, communities and businesses throughout the world. Global cooperation is of paramount importance to mitigate the effects of a virus that – by its very nature – knows no borders.

In an era of weak global governance, we believe that the private sector has a vital role to play in charting an effective response to the crisis unfolding before us. As the institutional representative of 45 million companies, the International Chamber of Commerce is uniquely positioned at both global and local level to:

- Shape public policy responses to both the health and economic impacts of COVID-19
- Forge vital partnerships between the private sector, governments and international organizations
- Provide essential tools and resources to enable businesses continuity and enable enterprises to take effective action to limit the spread of the virus

COVID-19: ICC Strategic Response

Across our network, ICC is working on a range of policy and external affairs initiatives in response to the three phases of the COVID-19 crisis:

- *Mitigating the crisis* – emergency interventions to stem the spread of the coronavirus pandemic and limit economic damage
- *Avoiding further disruption* – upstream engagement to mitigate potential and emerging challenges to an effective response to the pandemic
- *Rebooting and rebuilding the global economy* – shaping mid-term thinking on the design of a post-COVID-19 economy.

Our engagement draws on the expertise of ICC members and policy commissions, and leverages our unique position with key intergovernmental organizations.

To find out more about our work and how to get involved please contact your [ICC National Committee](#).

Mitigating the Crisis

In response to the immediate impacts of COVID-19, ICC has initiated a number of emergency interventions to limit the human and economic damage of the pandemic:

- *Enabling business action to stem the spread of COVID-19:* trusted guidance to promote workplace safety and initiatives to [leverage business expertise](#) in shaping public health responses to the pandemic
- *Avoiding disruption in essential supply chains:* [top-level advocacy](#) – focused on G20 governments – to reverse the rapid escalation of trade barriers now disrupting the supply of medical equipment and other essentials
- *Ensuring support for MSMEs:* ICC’s “[Save our SMEs](#)” campaign is working to ensure small businesses receive the support needed to weather an unprecedented economic downturn
- *Maintaining the supply of trade finance:* leveraging the expertise of ICC’s Banking Commission, we are [providing guidance](#) to financial institutions and regulators on measures to keep trade finance flowing in the face of COVID-19 related disruptions
- *Avoiding contractual disputes:* building on our suite of widely-used model contracts and dispute resolution services, we are [supporting businesses](#) in navigating commercial disruptions caused by the crisis.

Mitigating the Crisis Save Our SMEs (SOS)

In many parts of the world, the COVID-19 pandemic has badly hurt companies of all kinds – but particularly micro, small, and medium-sized enterprises (MSMEs). Demand and liquidity have dried up, jobs have been lost, and entrepreneurs have dramatically curtailed or closed their businesses – at least temporarily.

How can small businesses recover? With MSMEs accounting for half of global economic activity and employment, the answer to this question is critical to the future of the world economy and those whose livelihoods depend on it.

ICC's SOS Campaign was launched with an initial [Call to Action](#) with the objective of:

- *Shining a spotlight on the devastating impact of COVID-19 on small businesses and their employees*
- *Ensuring effective policy and fiscal responses at both the international and national levels*
- *Providing resources and tools to help small businesses navigate the crisis*

The campaign is built on policy content leveraging ICC's cross-cutting expertise and Commissions in a range of areas – such as taxation, antitrust, corporate responsibility and financial services.

Mitigating the Crisis Shaping Global Debate

ICC is active throughout the international media to shape an effective global response to halt the immediate COVID-19 crisis:

The New York Times

Global Business, Workers, Civil Society Join Call for Debt Relief for Poorer Nations

By Reuters

April 10, 2020

WASHINGTON — The International Chamber of Commerce on Friday joined a global trade union and a major civil society group to urge immediate debt relief for the world's poorest countries to help them fight the coronavirus pandemic and mitigate its economic impact.

Letter: Time for global leaders to put past squabbles aside

From John WH Denton, Secretary General, International Chamber of Commerce, Paris, France

Avoiding Further Disruption

ICC is working to mitigate emerging risks to the fight against COVID-19 and business operations. Priority interventions include:

- *Safeguarding the development of COVID-19 vaccines and treatments:* proactive advocacy to counter potential hurdles to global R&D collaboration
- *Halting the production and distribution of counterfeit goods:* public awareness messaging being deployed through ICC's [BASCAP initiative](#) to warn against the purchase of fake COVID-19 related supplies
- *Combating cyber attacks:* practical engagement to help MSMEs navigate growing cyber risks in the context of widespread teleworking
- *Protecting refugees and displaced persons:* [mobilizing business support](#) for global efforts to prevent further spread of COVID-19 to the world's most vulnerable communities.

Shaping the Rebuild

It is already clear that the effects of COVID-19 will necessitate a major rebuild of the global economy and associated governance frameworks. ICC is uniquely positioned – given its cross-cutting policy expertise and deep global networks – to act as a key interlocuter in this process, leading the charge to:

- *Build back better*: informing the development of policies at global and local levels to ensure that recovery programs squarely address longstanding challenges – from climate change to inequality
- *Reform multilateral governance*: providing recommendations for a renewal of intergovernmental institutions, leveraging real-world insights from the COVID-19 crisis
- *Enhance business resilience*: shaping necessary reforms to enhance the resilience of business to external shocks based on private sector expertise.

Working together we can overcome the crisis that currently confronts us and emerge more resilient than before.

Policy projects and advocacy

Cybersecurity

- ICC seeks closer collaboration between business and government to ensure future Internet- and cybersecurity-related developments don't splinter into differing approaches at national, regional and global levels.
- What are the current and expected policy pressure points?
- What policy and advocacy action can be most impactful? Where?

- ❖ **Why:** One of the strongest issues where business is caught between geopolitical interests is cyber security. At the same time cyber security is a cost and risk for companies from large to small with business having an important role to play.
- ❖ **What:**
 1. **Capacity building:** leveraging partnerships to advance cybersecurity capacity building – work with GFCE, CRI
 2. **Advocacy:** Promote business views on cybersecurity norms and behaviours among governments and the private sector – observing and engaging OEWG, GGE
 3. **Policy development:** Cultivate common understanding of cybersecurity issues and concepts – baseline issues paper and consultation with members on further steps
- ❖ **How:** The Secretariat to pool and share knowledge with members and establish working groups

COFFEE BREAK

MEETING TO RESUME AT 16:00

IGOs activities on digital economy

- How should ICC prioritize engagement on pressure points and issues that impact broad business?
- Are there cross-cutting policy issues that members are following and would benefit from greater ICC engagement?

- ❖ **Why:** IGOs and regional organizations are embarking on digital agendas and exploring the impact of the digital economy and the opportunities and challenges ICT brings for sustainable development, e-commerce, digital trade, etc.
- ❖ **What:** ICC has a unique position as observer to the United Nations and its global membership helps convene business engagement in these fora.
- ❖ **How:**
 - ICC Secretariat to track and pool information and share it with members.
 - Members to flag important issues and help decipher priorities and actions.

CHALLENGES AND OPPORTUNITIES IN DIGITALIZATION FOR THE BUSINESS COMMUNITY

OBJECTIVE

The Digitalization Taskforce helps drive the digital transformation for businesses and society more broadly. Leaders from all B20 countries address both the challenges and the opportunities associated with digitalization.

A new challenge: emerging technologies

- Digital transformation affects all dimensions of society
- Digital opportunities come with significant challenges (e.g. how to handle individual privacy and sensitive data)

Digitalization as a source of growth

- Digitalization offers endless opportunities and potential efficiency gains for businesses (e.g. leveraging big data, automating key processes, and using digital solutions to interact with customers)

Business community can shape the change agenda

- The Digitalization Taskforce addresses the most pressing issues related to the digital economy by developing recommendations to successfully drive the digital transformation for businesses and society as a whole

GLOBAL DIGITALIZATION TRENDS REQUIRE ANSWERS FROM THE G20 GOVERNMENTS & THE BUSINESS COMMUNITY

Artificial intelligence

AI/Machine Learning could add US\$15tn of value by 2030 but its increased use raises ethical questions¹

Internet of Things

Industrial IoT is changing manufacturing processes but comes with significant exposure to cyber risks

Cybercrime

The annual global economic damage caused by cyber-attacks could reach up to US\$6tn by 2021²

5G & ICT infrastructure

5G goes beyond traditional connectivity and could offer a large first-mover advantage

Digital taxation & e-commerce

The rise of e-commerce puts regulation for cross-border data flows and digital taxation on the global agenda

Data analytics and data privacy

The wealth of data grows exponentially, raising questions about privacy and data monopolies

Digital skills

Digital innovations require re-/ upskilling of the current and future workforce to be able to meet demand for digital talent

Blockchain

Blockchain could dramatically change the digital economy and draws quickly growing investment (300% growth 2017-18)¹

3D printing

This technology has the potential to democratize the production of goods e.g. from manufacturing to medical supplies –regulatory aspects need to be considered

Cloud Computing

The delivery of computing services (e.g. servers, databases over the Internet) allows for faster innovation, flexible resources and economies of scale

1. Statista (2019). Digital Economy Compass 2019. 2. Cybersecurity Ventures (2019). 2019 Official Annual Cybercrime Report.

FOCUS TOPICS ARE CHOSEN ON THE BASIS OF THREE LENSES

Selection Criteria for Focus Topics

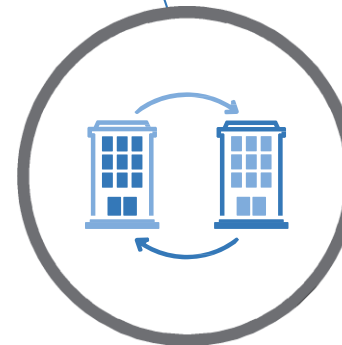

Global agenda

- Relevance on international policy agendas
- Considering previous G20/B20 cycles

G20/ B20

G20/B20 priorities

- Alignment of taskforce focus topics with overall B20 priorities
- Coherent and balanced selection of topics across taskforces

Relevance for the global business community

- Survey with B20 taskforce members to identify priorities
- Global action required to address challenges identified

WE'VE ALIGNED ON FOUR RECOMMENDATIONS

Enabling digital infrastructure & fostering cyber security

Advancing all aspects of artificial intelligence

Driving digital inclusion and growing digital skills

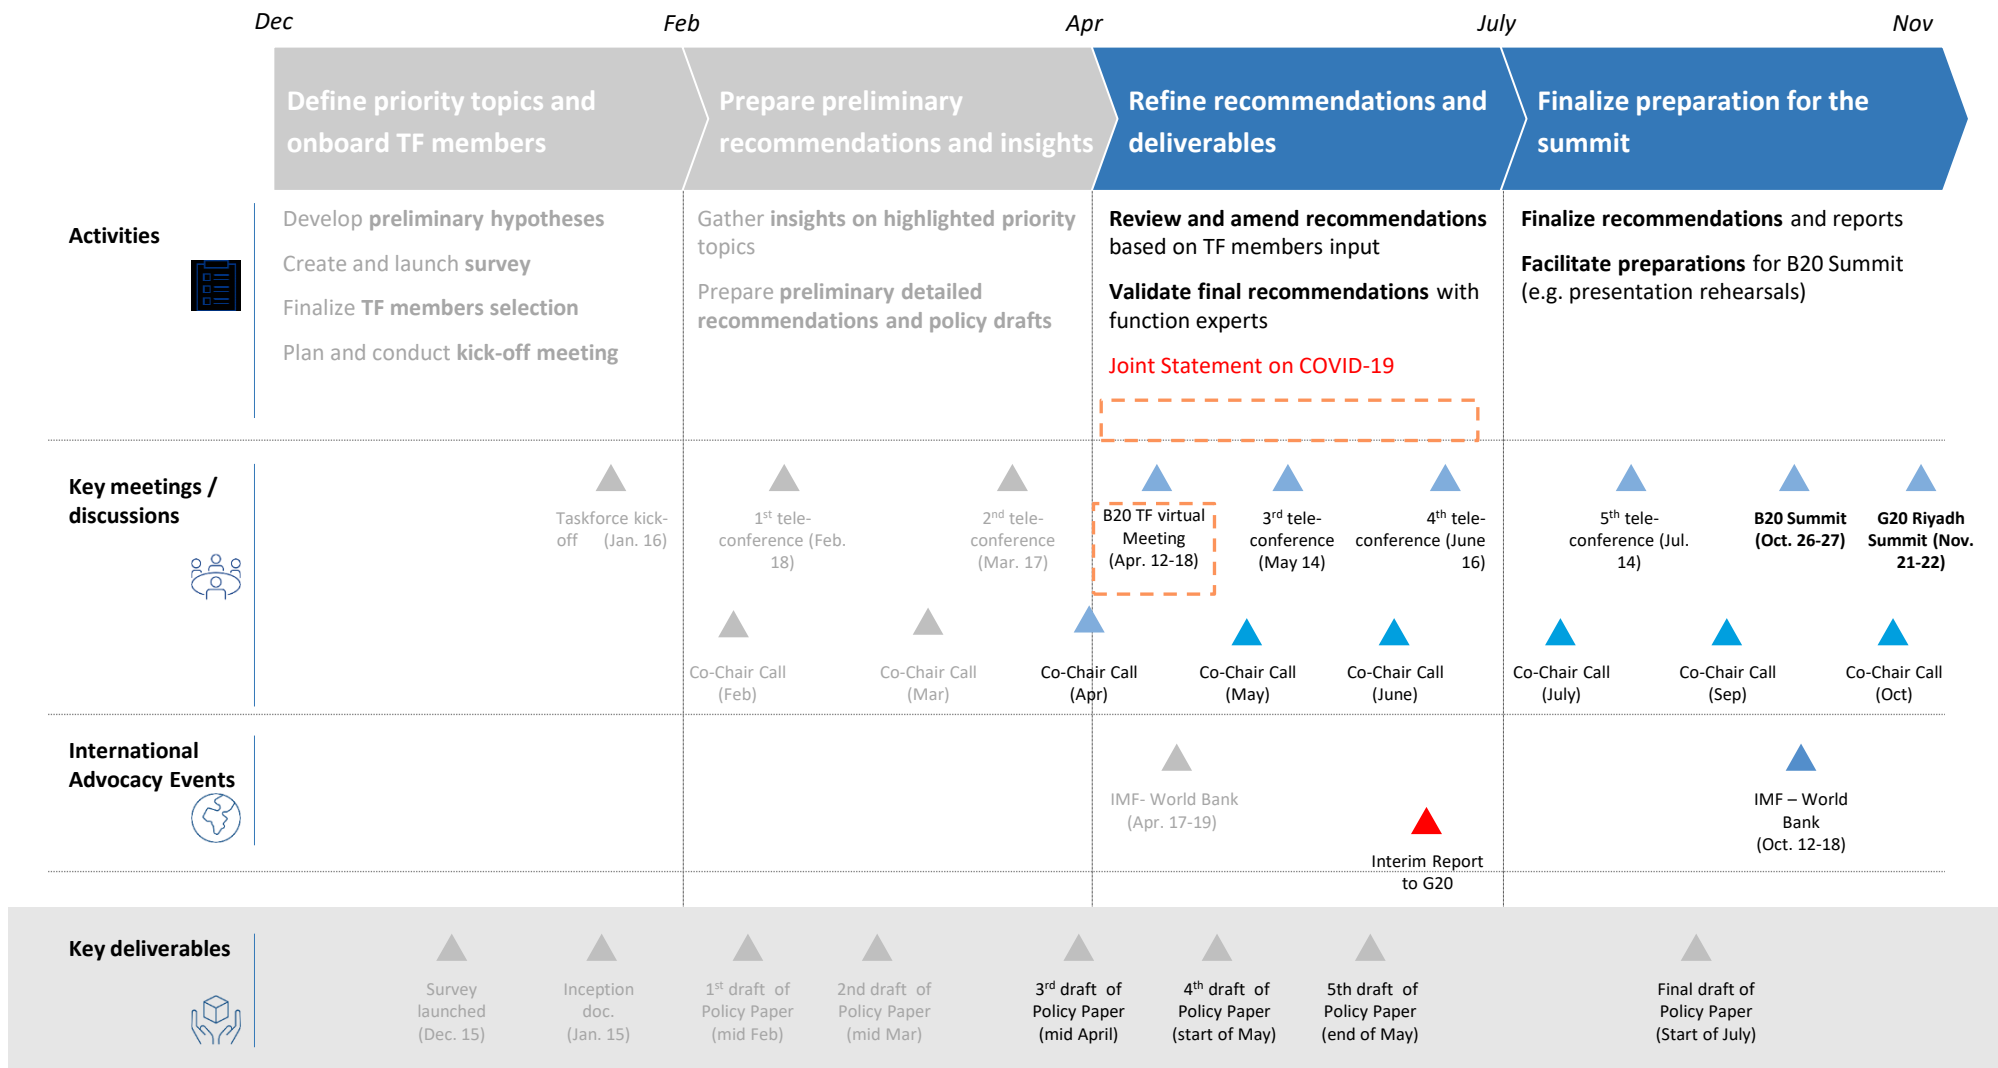

Laying the foundation for smart cities

Note:

Interaction of MSMEs with digitalization is addressed as a subtopic within the focus topics as this is a crosscutting topic. There is an explicit Trade & Investment Taskforce where digital trade will be considered.

WE HAVE BUSY MONTHS AHEAD OF US

**Majority of future events in this timeline will take place virtually.*

THANK YOU

ICC external engagement with the EU and UN

COFFEE BREAK

MEETING TO RESUME AT 17:00

Artificial Intelligence

- What are the most notable developments on AI guidelines and principles? How can business be best engaged as we are moving from principles to practice?
- Where is ICC business outreach most needed? What advocacy efforts would be most effective?

- ❖ **Why:** To harness benefits and mitigate risks of AI, governments, businesses, intergovernmental and multi-stakeholder organizations, and the technical community have developed or are actively considering guidelines, principles and standards along which AI can or should be developed and deployed.
When it comes to the application of these guidelines, the private sector is on the front lines, be it in the design, distribution or utilization of AI.
- ❖ **What:** ICC has the unique opportunity to convene businesses worldwide to provide a common private sector perspective to discussions on AI worldwide as well as to demonstrate business action on implementing AI principles.
As initiatives are moving from principles to practice, dialogue with business it is of utmost importance.
- ❖ **How:** Research project, commissioned through the ICC Research Foundation, reviewed by ICC DEC members, in partnership with academic and industry experts.

OECD work on AI

From principles to practices

ICC

27 April 2020

Karine Perset

- Goal: foster policy ecosystem for trustworthy AI that benefits people and planet.
- Inter-governmental standard. Adopted May 2019 by 36 OECD + 8 partner countries. Same as G20 AI Principles approved June 2019.
- Proposal for principles developed by first multi-stakeholder AI expert group @ OECD (AIGO). AIGO included UNESCO & EC representatives.
- Non-binding yet strong political commitment to implement & OECD monitoring.

10 Principles, covering two areas:

Principles for responsible stewardship of trustworthy AI

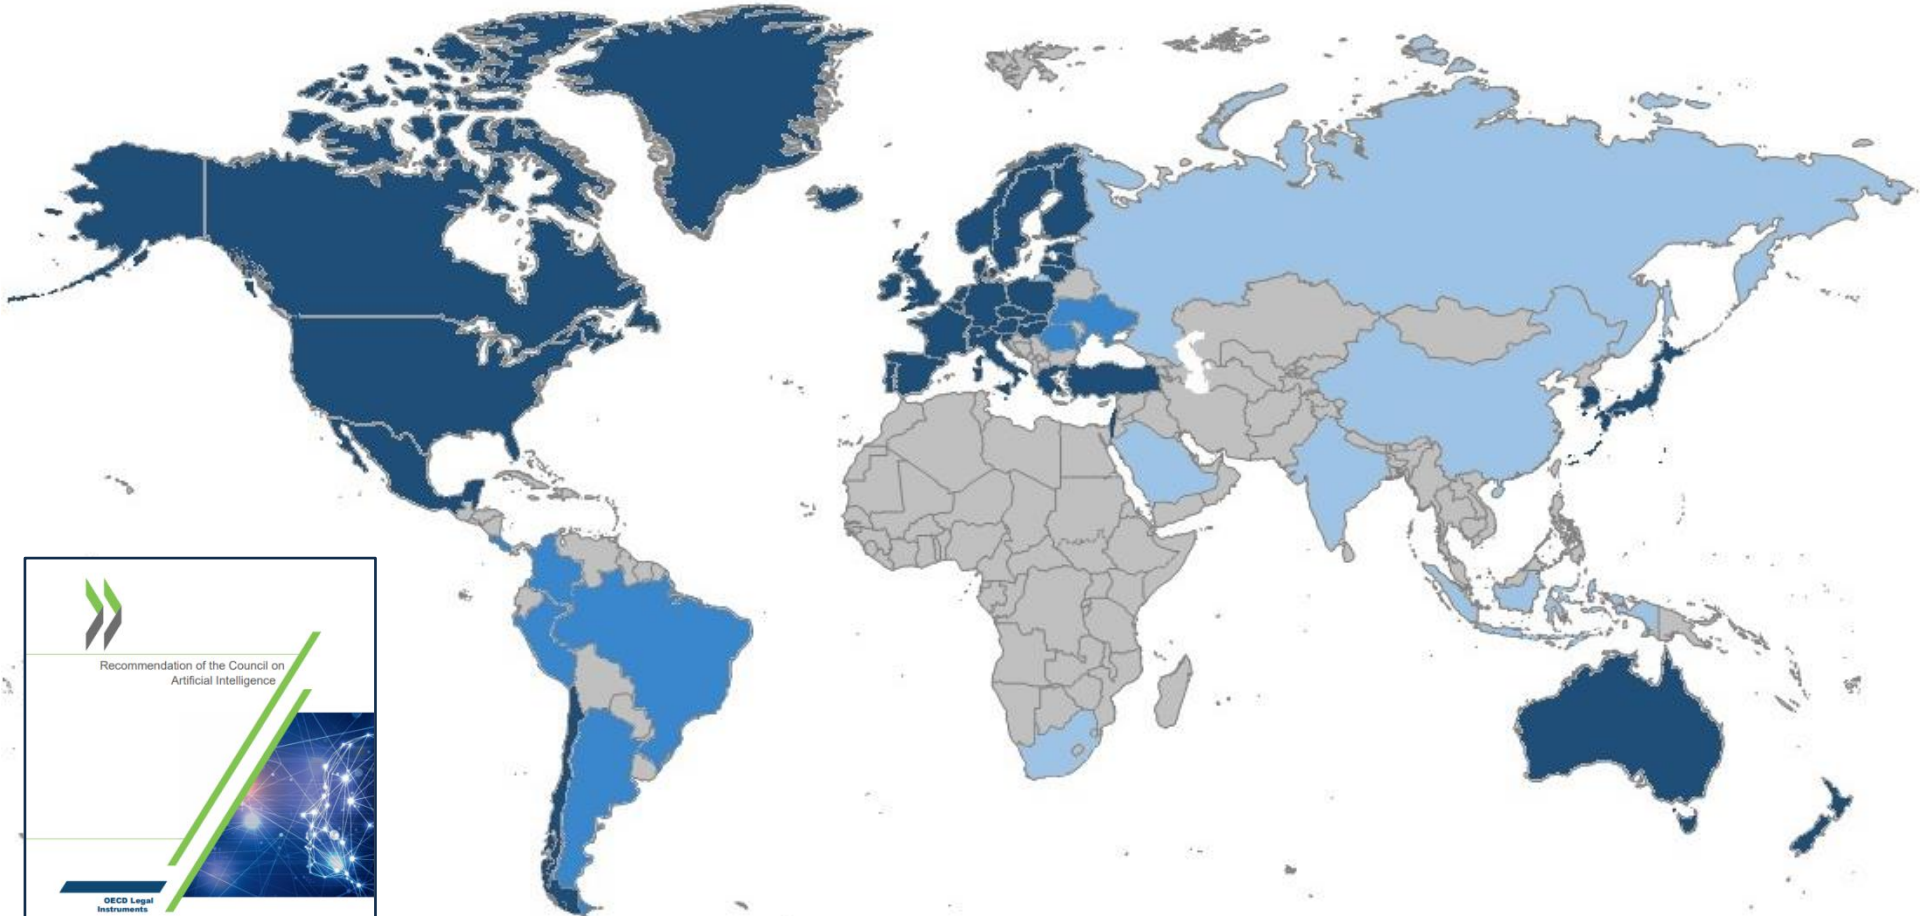

- 1.1. Inclusive growth, sustainable development and well-being
- 1.2. Human-centred values and fairness
- 1.3. Transparency and explainability
- 1.4. Robustness, security and safety
- 1.5. Accountability

National policies and international cooperation for trustworthy AI

- 2.1. Investing in AI research and development
- 2.2. Fostering a digital ecosystem for AI
- 2.3. Providing an enabling policy environment for AI
- 2.4. Building human capacity and preparing for labour transition
- 2.5. International cooperation

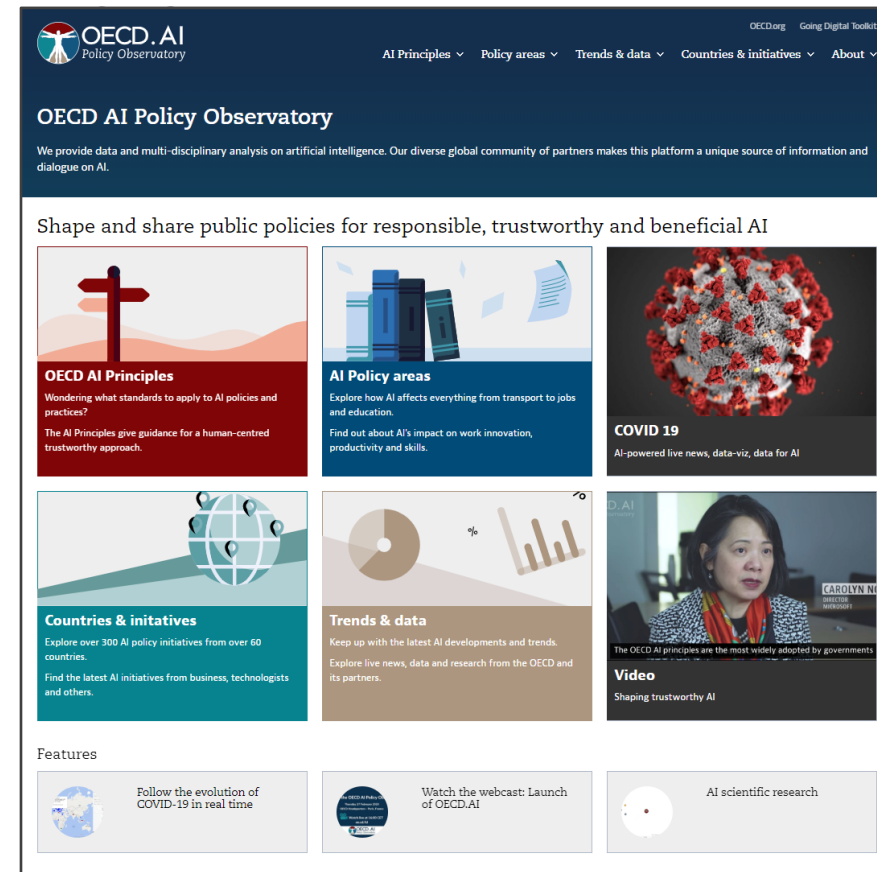

Governments that have adhered to the OECD or G20 AI principles

 OECD members  Adherents  G20 principles, based on OECD

Platform to share and shape public policies for responsible, trustworthy and beneficial AI

- OECD AI Policy Observatory (OECD.AI) launched 27 Feb 2020.
- Also first meeting of **OECD Network of Experts on AI (ONE AI)**.
- 3 characteristics:
 - **multi-stakeholder**
 - multi-disciplinary
 - evidence-based
- Featuring COVID-19 AI-powered live news, data-viz, data for AI (Mar 2020)

The screenshot shows the homepage of the OECD.AI Policy Observatory. At the top, there is a navigation bar with the OECD.AI logo and menu items: AI Principles, Policy areas, Trends & data, Countries & initiatives, and About. Below the navigation bar, the main heading reads "OECD AI Policy Observatory" followed by a brief description: "We provide data and multi-disciplinary analysis on artificial intelligence. Our diverse global community of partners makes this platform a unique source of information and dialogue on AI." The main content area is titled "Shape and share public policies for responsible, trustworthy and beneficial AI" and features several interactive tiles: "OECD AI Principles" (with a red cross icon), "AI Policy areas" (with a blue book icon), "COVID 19" (with a red virus icon), "Countries & initiatives" (with a globe icon), "Trends & data" (with a pie chart icon), and "Video" (with a woman speaking icon). At the bottom, there is a "Features" section with three tiles: "Follow the evolution of COVID-19 in real time" (with a globe icon), "Watch the webcast: Launch of OECD.AI" (with a video icon), and "AI scientific research" (with a circular icon).

UNESCO's work on Artificial Intelligence An Overview

Sasha Rubel
Programme Specialist, Digital Innovation and Transformation
Communication and Information Sector

27 April 2020

There is urgency to act:

1. Global threats: Climate change, deep societal concerns, COVID-19
2. Emerging technologies (AI++) are the new geopolitics
 - Challenges to global governance, seismic global power shifts
 - Global South: Digital and knowledge gaps widen
3. New uses and misuses of technologies, sprinting ahead
 - Unregulated AI advances have un-intended consequences (bias,...)
 - Big data and AI are abused to undermine democracies and human rights
4. Harness AI and emerging technologies
 - 750 Million illiterates, 65 Million teachers missing
 - 21 century skills & tools – MIL, digital skills, OER

VISION

A world where **AI opportunities**, particularly the potential to achieve the UN Sustainable Development Goals, are realized and **AI ethical challenges**, particularly the risk of increasing inequality gaps, are **mitigated**.

- 1.** Building literacy, knowledge and skills among stakeholders and participants on AI
- 2.** Crowdsourcing perspectives and identifying key ethical values for AI
- 3.** Making recommendations to co-design AI Ethics principles and practices
- 4.** Building communities with a shared purpose to harness AI for sustainable development

INFORM CAREFULLY SELECTED PROJECTS IN AI ETHICS & GOVERNANCE ECOSYSTEM

First consultation: UNESCO's standard-setting instrument on AI Ethics

COLLECTIVE INTELLIGENCE ONLINE PLATFORM

Once participants have engaged with the AI Literacy Toolkit, they are invited to a four-stop journey.

LEARNING

Build understanding of AI and its ethical implications across use cases with the AI Literacy Toolkit. Raise awareness on UNESCO's work on AI ethics and the development of its standard-setting instrument.

ENGAGING

Engage participants with a survey to crowdsource their initial perspectives on key AI ethics issues through questionnaires and polls.

DEBATING

Debate key issues around the responsible and ethical adoption of AI. Select AI use cases relevant for UNESCO's scope of work (eg. education, sciences, culture) and for the development of its standard-setting instrument. Use cases will be completed by the challenges identified in the COMEST study.

SEEKING FEEDBACK

Deep dive to gather direct citizen input into UNESCO AHEG's first draft on a standard-setting instrument on AI ethics. Ensure a diverse and representative amount of participants review the standard-setting instrument..

SYNTHESIZING

Identify key takeaways and prioritize most relevant citizen feedback to be integrated into the standard-setting instrument. Produce report highlighting most important contributions from the online consultation.

“THE GREATEST DANGER
IN TIMES OF TURBULENCE
IS NOT THE TURBULENCE

Decontaminated

The screenshot shows the app's main interface. At the top, there's a header with 'Conseils et recommandations' and a sub-header 'Basé sur votre géolocalisation, vos informations anonymes de déplacements et votre profil, nous vous donnons des conseils personnalisés.' Below this, there are several sections:

- 'Recommandations' with a 'Stay home' tip: 'Go out only for essentials. Make it short and sweet.' and a 'See all recommendations' link.
- 'Conseils personnalisés' (Personalized advice) with items like 'Stay home' (because you are 70 years old or more), 'Ask for someone to get essentials for you if possible', 'Stay 2 meters away from strangers', and 'Wash your hands'.
- 'Health check' sections asking 'Has your health profile changed in the last 2 weeks?'.
- 'Quote' from Justin Trudeau: 'This is the best privacy model I have ever seen an app based on'.
- 'Self-diagnostic' section asking 'Do you have any symptoms?'.
- 'Diagnostic' section asking 'Did you get tested for COVID-19?'.
- 'Ressources' section with a 'See all official ressources' link.
- A bottom section with a rainbow icon and text: 'Partage l'application et aide à prévenir la propagation!' and a 'Partager' button.

The screenshot shows the registration form for the CO>i app. It includes a progress indicator (1, 2, 3) and the following fields:

- 'Quel âge avez-vous?' (Age selection)
- 'Choisir votre sexe' (Gender selection)
- 'I currently smoke or am a former smoker' with 'OUI' and 'NON' buttons.
- 'I have diabetes' with 'OUI' and 'NON' buttons.

The screenshot shows an article page for 'OpED DG and Yoshua Bengio'. It features a newspaper background with 'The New York Times' and 'F.B.I. IS' visible. The article text includes:

- 'I am or immun... meds... autoim... or orga...'
- 'I have...'
- 'I currently have symptoms.'
- 'Someone close has COVID-19 (e house or at work...'
- 'I traveled outside Canada in the la days.'
- 'I'm in close cont with someone w sick with respira symptoms, who recently travelle outside Canada.'
- 'I'm a healthcare worker.'

 At the bottom, there are 'Précédent' and 'Terminer' navigation buttons, and a 'Partager' button.

DANNY LEE & COLLECTIVE "Raised Fists"

Protect your Life

Gathered around the Nigerian artist Danny Lee, the "Raised Fists" collective is mobilized to raise awareness against the spread of COVID 19 in Niger, one of the poorest countries in the world. Composed by Danny Lee, the song is carried by young committed artists who speak in their languages (Djerma, Haoussa, Tamashek and French) to their brothers and sisters in Niger. "Through their voices and by associating Peulh Bororo the nomadic people of the Sahel, it is all the

With the support of UNESCO

Collective Intelligence and AI against COVID-19

Comprehensive

Mapping all major sources, initiatives, players and best practices to produce a holistic picture of each domain.

Authoritative

Engaging with relevant multilaterals and domain experts to produce reliable insight and reduce bias.

Up-to-date

Augmenting human intelligence with high-speed AI to ingest the latest data and information around the world.

OECD AND UNESCO: COMPLEMENTARY, NOT IN COMPETITION

OECD

- 36 Member States and Partner Countries
- Supports governments through policy analysis, dialogue and engagement and identification of best practices
- Maps economic and social impacts of AI technologies and applications
- Sheds light on policy issues such as labor market developments
- Upstream policy advice with a focus on economic and social policy and statistics in all areas except defense
- Public policy priorities focused on AI governance and good practice

UNESCO

- 193 Member States and Network of 60 + field offices
- In depth focus on areas such as culture, education, the sciences, communication and information, gender equality, and developing countries
- Focus on ethics and human rights and multidisciplinary and multi-stakeholder debate on peace, cultural diversity, gender equality, and sustainability – themes that are generally neglected.
- 25 years of convening multi-stakeholder dialogue and normative recommendations on the Ethics of Science and Technology at the global level
- Mandated by United Nations in WSIS Follow up to lead UN work in this field, facilitator of action line C10 (ethics of the information society)
- Intergovernmental programme IFAP (Information for All Programme)

COFFEE BREAK

MEETING TO RESUME AT 18:00

Linkages with other sectors

- What are the most notable developments on policy areas related to the digital economy?
- Do members have expectations on policy and pressure points for 2020?
- How can ICC efforts be useful and impactful?

- ❖ **Why:** ICC works to help business learn what influences positive or negative shifts in policy in one area that might have significant impact in their primary area of interest.
- ❖ **What:** ICC can serve as a helpful resource to members by sharing policy updates within the commission to keep abreast of policy developments and see where, if necessary, ICC policy and advocacy could be leveraged.
- ❖ **How:** ICC Secretariat members of various ICC Commissions and hubs to brief the commission on developments taking place in their work area. Members to brief the commission on developments taking place in their country/region. ICC Secretariat can help pool knowledge and share between members to help commissions analyze where ICC could be impactful.

ICC Inclusive & Green Growth Knowledge Hub

Key Priorities

- **Making Climate Action Everyone's Business**
 - UN Framework Convention on Climate Change (UNFCCC) Focal Point for Business and Industry
 - COP26 engagement (UN Climate Change Conference 2021)
 - Nationally Determined Contributions (NDCs) process
 - ICC Chambers Climate Coalition
 - ICC sustainable finance initiative
 - Climate Positive
 - ICC Task Force on Climate Change Related Disputes Report
 - ICC trade and climate change consultations
- **ICC advances business and biodiversity agenda (Business for Nature Coalition and UN Biodiversity Conference 2021)**

ICC Inclusive & Green Growth Knowledge Hub

COVID-19 Impacts

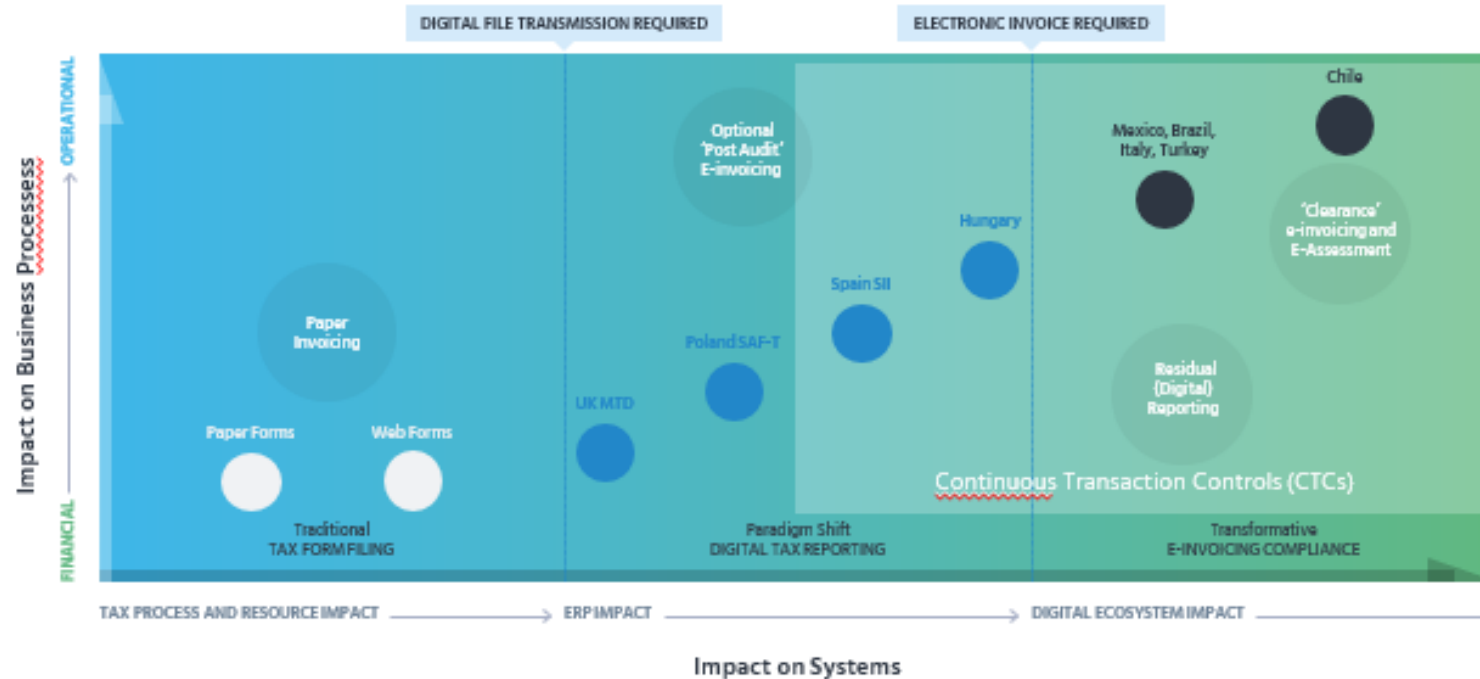

- [John Denton message on Earth Day: A view to build back better](#) (22 April 2020)
- Importance of comprehensive economic recovery plans coherent with existing climate commitments

Possible Linkages

- Technology and climate/biodiversity nexus
- Development of concrete, digital solutions

Continuous Transaction Controls

Journey to Continuous Transaction Controls

- CTCs are having a major impact on business systems and processes
- This is not a tax issue – tax happens to be the primary manifestation of this phenomenon right now
- The main reason is disharmonized approaches – contradict digital transformation
- Country-specific approaches don't benefit any stakeholder
- Adherence to good practice could remove friction from existing VAT compliance processes
- CTCs are not a magic bullet – appropriate use of any technology for reducing tax burdens must be encouraged
- ICC 2 years ago set out in multi-stakeholder approach to start a dialogue and codify practices

Continuous Transaction Controls

CTC PRINCIPLES

- Deliverables of 'first' ICC process driving private/public sector dialogue around the adoption of technologies towards the real-time economy
- 'Real-time' creates interdependencies that require different policy advocacy models including real-time dialogue

For general release
Aimed at policy makers

CTC PRACTICES STOCK-TAKING REPORT

For targeted communications
Aimed at CTC practitioners

- Should be living documents – maintenance will require balanced practitioner group of sorts
- Number of outstanding topics: transactional vs e-audit; pre-filled returns; B2C etc to be addressed in potential follow-up
- Dialogue with IGOs recurring question: these principles and practices have no teeth – can e.g. OECD help there?

ICC DISPUTE RESOLUTION SERVICES

ICC COMMISSION ON ARBITRATION AND ADR

Dr. Hélène van Lith

27 April 2020 | Paris

ICC DISPUTE RESOLUTION SERVICES AVAILABLE TO THE DIGITAL ECONOMY

ICC International Court of Arbitration

- Only truly global arbitration institution in all sectors and world leader in DRS
- Significant number of high-profile Tech Disputes administered by the Court
- Court's Regional Directors in close contacts with businesses in their region
- Efficiency and cost effective, Confidentiality
- Expedited Procedure and Emergency Arbitrations

ARBITRATION CASES	2014		2015		2016		2017		2018	
TELECOMMUNICATION & SPECIALIZED TECHNOLOGIES	54	6,8%	47	5,9%	51	6,1%	50	6,2%	45	5,3%
TOTAL CASES	791		801		831		810		842	

ICC International Centre for ADR

- Mediation, Expertise and Expert Determination and Dispute Avoidance
